EFPP | PERIO MASTER CLINIC

THE BERNESE CONCEPT FOR THE TREATMENT OF SOFT TISSUE DEFECTS AROUND TEETH AND DENTAL IMPLANTS

COURSE & HANDS-ON WORKSHOP WITH PROF ANTON SCULEAN

PROGRAM – THURSDAY, MARCH 5TH, 2020

The predictable coverage of multiple adjacent recessions and of single mandibular deep recessions is still a challenge for clinicians. New data indicate that the use of the modified coronally advanced tunnel (MCAT) or the newly developed laterally moved tunnel (LMT) in conjunction with different biological factors, connective tissue grafts, certain collagen based soft tissue grafts or combinations thereof may result in predictable coverage of single and multiple adjacent gingival recessions and also long-term stability. Moreover, in certain, well selected cases this technique can also be successfully applied to correct soft tissue defects around dental implants. The present lecture will provide a comprehensive treatment philosophy on the surgical risk factors and biological principles that need to be considered to optimize the results. Presentations of clinical cases and of surgical videos will demonstrate the step-by- step procedure for the MCAT and LMT for the treatment of various types of soft tissue defects around teeth and dental implants.

THEORETICAL PART

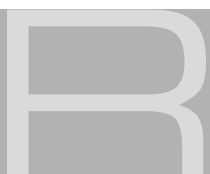

14:00 - 14:45 The Bernese concept for the treatment of soft tissue defects around teeth and dental implants.

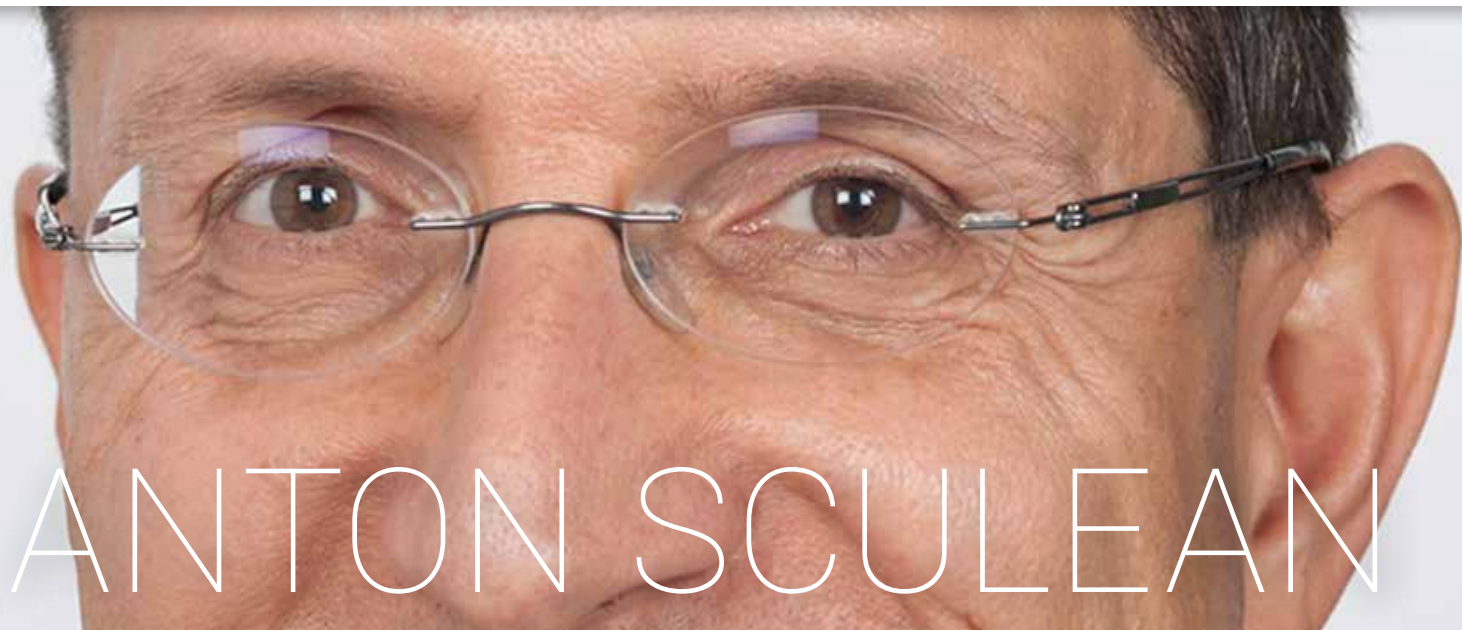

14:45 - 15:00 Coffee break

PRACTICAL PART

15:00 - 16:15 **Hands-On Workshop I**
The Modified Coronally Advanced Tunnel (MCAT) with subepithelial connective tissue graft and hyaluronic acid for the treatment of gingival/mucosal recessions.

16:15 - 17:00 **Hands-On Workshop II**
The laterally closed tunnel (LCT) for the treatment of single deep mandibular recessions.

PROFESSOR AND CHAIRMAN | DEPARTMENT OF PERIODONTOLOGY | EXECUTIVE DIRECTOR OF THE SCHOOL OF DENTAL MEDICINE | UNIVERSITY OF BERN

Anton Sculean is professor and Chairman of the Department of Periodontology and currently the Executive Director of the School of Dental Medicine, University of Berne, Switzerland.

He qualified in 1990 at the Semmelweis University in Budapest, Hungary and received his postgraduate training at the Universities Münster, Germany and the Royal Dental College Aarhus, Denmark. He received his PhD from the University of Saarland, Homburg, Germany. From 2004 to 2008 he was appointed Head of the Department of Periodontology and Program Director of the EFP accredited postgraduate program at the Radboud University in Nijmegen, the Netherlands. In December 2008, he was appointed Professor and Chairman of the Department of Periodontology at the University of Bern, Switzerland.

Currently, he also serves as Executive Chairman of the School of Dental Medicine, University of Bern.
